CALFED Preferred Program Alternative and Related Actions

Improve water quality for ecological, drinking and other beneficial uses and maintain quality once achieved.

Assure efficient use of existing and any new water supplies developed by the CALFED Program.

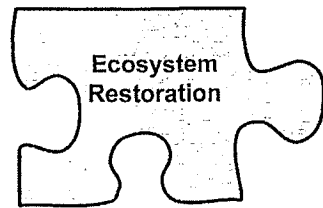

Facilitate water transfers and further development of a water transfer market.

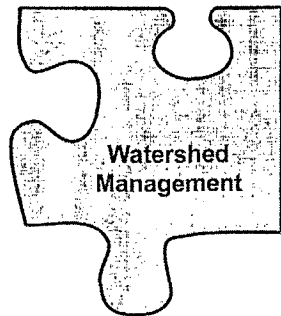

Improve levee stability.

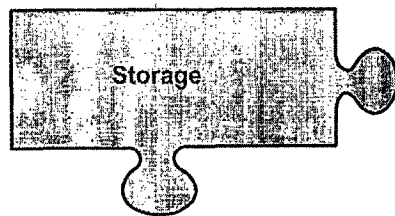

CALFED Preferred Program Alternative and Related Actions

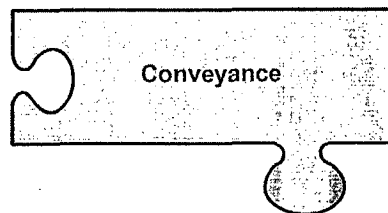

Achieve or contribute to the recovery of listed species. Improve and increase aquatic and terrestrial habitats. Improve ecological functions to support sustainable populations.

Provide assistance, financial and technical, to local watersheds.

Groundwater and surface storage: to improve water supply reliability; provide water for the environment when needed most; and provide flows timed to maintain water quality and protect levees.

Through-Delta approach. Includes potential actions in the North and South Delta.
